What People are Saying About U-M Six Sigma

“Excellent! It was very helpful to be able to contact a professor and speak with him to help design my study”

“Very practical and pertinent to our processes; this program will allow us to be more vigorous and structured in a number of areas”

“I recently took an online course that was just audio and slideshows. This course was more dynamic and the interaction with the instructor during presentations really added to the classroom environment”

“Instructors were fantastic and material was well explained, thorough, and relevant”

Choose from Two Disciplines

The Six Sigma Manufacturing course uses cases from the manufacturing industry to illustrate how to improve quality, cost, and delivery. The Six Sigma Transactional course applies Six Sigma tools in a non-manufacturing context, showing how nearly all systems can benefit by reducing variation and improving process flow. Both courses are available for either Green Belt or Black Belt Certification.

On Campus Option for Black Belt Manufacturing

If you want to earn academic credit and Six Sigma Certification simultaneously and you have been admitted to the College of Engineering, you can enroll in MFG 461: Quality Engineering Principles & Analysis, a three-credit on campus course. For more information about admission, the academic calendar, and other topics, email MEonline@umich.edu or call (734) 647-7200.

Green Belt Foreign Language Versions

The U-M Green Belt program has been offered in a total of nine languages for over ten years. For more information about foreign language versions of this program, please contact MEonline@umich.edu.

About Michigan Engineering and Integrative Systems + Design

The University of Michigan’s College of Engineering was founded in 1853. Today, Michigan Engineering and its academic departments rank in the top ten in their respective areas (U.S. News and World Report). The faculty’s ongoing research and industry consultation in engineering contribute to Michigan's strength and impact on professional development. Michigan Engineering’s research expenditures for fiscal 2014 totaled $217.9 million, placing it in the forefront of collegiate engineering research in the U.S.

Integrative Systems + Design (ISD) (formerly known as Interdisciplinary Professional Programs), a division of Michigan Engineering, offers credit courses to students on campus and at locations around the world. Recognized as a global leader in online education in addition to offering on campus programs, ISD provides lifelong learning to technical professionals, and has served more than 100,000 with intensive short courses, conferences, professional certifications, and online advanced degree and certification programs.

ISD responds to the needs of industry, healthcare, government, the military, and non-profit organizations with specialized education programs.

For more information about ISD, visit isd.engin.umich.edu

Six Sigma Certification Online and On Campus

Six Sigma from the Leaders and Best
At the University of Michigan, you’re taught by internationally respected industrial engineering professors and research scientists. Programs are available online with streaming video so that you can take your classes whenever and wherever you choose. More than 10,000 students have been certified through our online programs.

Learn more and register for courses at: isd.engin.umich.edu/SixSigma
Build Your Foundation with Green Belt Certification
U-M Green Belt courses lay the foundation for performance in a Six Sigma environment. Much of our training is focused on how to apply Six Sigma tools and methodologies. Green Belts meet a variety of needs within an organization-wide Six Sigma strategy, often providing implementation support for sub-tasks within a high-impact project. You will learn to apply Six Sigma tools and methodologies rather than acquiring a deep understanding of the statistical concepts behind them.

Lead a Project or Team with Black Belt Certification
The U-M online Six Sigma Black Belt certification course provides you with the necessary skills to execute Lean Six Sigma techniques and strategies at the Black Belt level. This course examines many Lean Six Sigma analytical and problem-solving techniques from descriptive statistics to advanced design of experiments. Case studies developed from practical experiences of University of Michigan instructors are used to demonstrate the application of Lean Six Sigma tools and techniques, ultimately qualifying you for full Six Sigma Black Belt Certification.

Prerequisites
Green Belt Course
- Basic Microsoft Excel Skills
- Basic Statistics Recommended

Black Belt Course
Participants should have working knowledge of the above items as well as:
- Descriptive statistics
- Basic graphical analysis
- Basic linear regression/correlation
- Basic probability distribution fitting
- This course requires the use of Minitab® statistical software (or equivalent) and includes more advanced statistical analysis tools
- All Black Belt participants are given online entry into the U-M Green Belt course for the purpose of reviewing basic level lectures

Professional Certification
Professional Certification for Green Belt and Black Belt requires successful completion of required exercises and a pre-approved project. In addition Black Belt Certification also requires passing a final exam.

Degrees of Success
Whatever your professional dreams, you’ll be a step ahead with exceptional graduate degree programs offered through ISD. These programs are immediately useful and relevant and some can be completed entirely online.

Visit our website at isd.engin.umich.edu to learn more.

Customized Programs
Our professors and industry experts are available to collaborate with you by tailoring programs to meet your specific organizational needs and presenting them at a location of your choice.

For more information, contact us at (734) 647-7200 or MEonline@umich.edu.
