Professional development short courses and certification programs include:
- Six Sigma Certification
- Transactional
- Manufacturing
- Healthcare
- Toyota Kata
- Lean-Six Sigma Certification
- Lean Manufacturing Certification
- Lean Product Development Certification
- Lean Office Certification
- Lean Healthcare Certification
- Lean Supply Chain for Healthcare Certification
- Lean Supply Chain & Warehouse Management Certification
- Lean Pharmaceutical Certification
- Michigan Human Factors Engineering Short Course
- Design & Control of Hybrid Vehicles
- Financial Management for Engineers
- Dynamics of Heavy Duty Trucks

Graduate degree programs currently offered include:
- Automotive Engineering
- Design Science
- Energy Systems Engineering
- Engineering Sustainable Systems
- Financial Engineering
- Global Automotive and Manufacturing Engineering
- Integrated Microsystems
- Manufacturing Engineering
- Pharmaceutical Engineering
- Robotics and Autonomous Vehicles

Graduate Certificates of Advanced Studies in Engineering (CASE) are also available in some of the programs.

Visit InterPro.engin.umich.edu to learn more about InterPro programs.

© 2011 The Regents of the University of Michigan 041511
The Regents of the University of Michigan, as an equal opportunity/affirmative action employer, complies with all applicable federal and state laws regarding nondiscrimination and affirmative action, including Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973. The University of Michigan is committed to a policy of nondiscrimination and equal opportunity for all persons regardless of race, sex, color, religion, creed, national origin or ancestry, age, marital status, sexual orientation, gender identity, gender expression, disability, or Vietnam-era veteran status in employment, educational programs and activities, and admissions. Inquiries or complaints may be addressed to the Senior Director for Institutional Equity and Title IX/Section 504 Coordinator, Office of Institutional Equity, 2072 Administrative Services Building, Ann Arbor, Michigan 48109-1432, (734) 763-0235, TTY (734) 647-1388. For other University of Michigan information call (734) 764-1817.
Design for Six Sigma Level 1 Certification Participants Receive Free QE Tools Software

The Design for Six Sigma Level 1 Certification course includes a copy of QE Tools statistical analysis software. QE Tools is a highly functional, user-friendly Excel-based add-in tool designed specifically for Six Sigma. Students can use QE Tools to apply various problem solving tools and statistical analysis methods for their Design for Six Sigma project. The principal architects of the QE Tools software, Dr. Patrick Hammett and Dr. Luis Garcia-Guzmán, are both actively involved in the University of Michigan’s Six Sigma Programs. Dr. Hammett is the primary developer of the University of Michigan’s Design for Six Sigma Program. This is an Excel tool that will make your job much easier!

TWO SKILL LEVELS

Level 1, DFSS Green Belt, focuses on the core concepts and methods of applying the IDDOV methodology within the new product development process. All of the tools and analysis techniques covered use Microsoft Excel and Add-In templates that are included with the course. For Level 1, a basic understanding of statistical analysis methods is recommended (e.g., Six Sigma Green Belt or equivalent).

Level 2, DFSS Black Belt, explores more advanced statistical analysis techniques in the areas of design of experiments, Taguchi methods, robustness, optimization, and reliability analysis. This course requires the usage of Minitab® (or equivalent) statistical software. We recommend that participants have Six Sigma Black Belt (or equivalent) training for this course and have successfully completed our Level 1 course.

WHO SHOULD ENROLL

These courses are aimed primarily at Product Designers, Manufacturing Engineers, and Project Managers working in new product development. To enroll in the DFSS Level 2 course, we recommend participants have applied statistical analysis training (e.g., Six Sigma Black Belt, Certified Quality Engineer, or equivalent).

PROGRAM FEES*

Design for Six Sigma Level 1 Green Belt Online Program
- $2,300 which includes QE tools statistical analysis software

Design for Six Sigma Level 2 Black Belt Online Program
- $2,000 without Minitab® software
- $2,890 with Minitab® software included

* Program fee at the time of brochure printing. Check our current program fee schedules at InterPro.engin.umich.edu. Fee subject to change. Pricing not valid for onsite or custom programs.

PROGRAM COMPONENTS

This course involves viewing lecture modules, participating in student discussion boards, completing homework exercises, and case studies. Level 1 is comprised of 24 modules which are detailed below. Level 1 is 40–50 hours of material which students should be able to complete within 120 days or less. Level 2 is comprised of 16 modules (6 of the main themes are listed below). Level 2 is 30–40 hours of material which students should also be able to complete in 120 days or less.

LEVEL 1 DFSS GREEN BELT MODULES

- Course Introduction: New Product Development Challenges
- IDDOV Methodology/Identifying Projects
- Defining Customer Requirements: Voice of the Customer
- Survey Analysis Methods
- Developing Functional Requirements/FAST Diagrams
- House of Quality
- Benchmarking
- Design Concept Generation
- Creativity and Innovation Tools
- TRIZ Overview

LEVEL 2 DFSS BLACK BELT THEMES

- Conventional Design of Experiments
- Taguchi Design of Experiment (Static and Dynamic)
- Design Concept Selection: Design Scorecards, Pugh Matrices
- Design Failure Mode and Effects Analysis (DFMEA)
- Design Issue Countermeasures, DFX Analysis, Axiomatic Design
- Design Optimization: Transfer Functions, P-Diagrams, and Robustness
- Two Group Hypothesis Tests: T-test, F-test, 2 Proportion Tests
- One Way ANOVA Tests
- Central Composite Designed Experiments
- Reliability Analysis/ System Allocation

GROUP DISCOUNT

Registration of five or more individuals qualifies an organization for a group discount. Call (734) 647-7200 or email MEonline@umich.edu to learn more.

CUSTOM PROGRAMS

This program can be customized and delivered in person at your site. Call (734) 647-7200 or email MEonline@umich.edu to learn more.

HOW TO REGISTER

Visit either of our Design for Six Sigma program websites: InterPro.engin.umich.edu/DesignforSixSigmaGreenBelt or InterPro.engin.umich.edu/DesignforSixSigmaBlackBelt. You may also send an email to MEonline@umich.edu or call (734) 647-7200.

PROGRAM INSTRUCTORS

PAT HAMMETT, Ph.D.
As the lead instructor for live and online Six Sigma programs, Dr. Hammett has provided education and training to over 9,000 participants across a variety of industries. He is the lead developer of several widely acclaimed programs for healthcare, manufacturing, business processes, and other environments, as well as Design for Six Sigma, leading to certification at the Green Belt and Black Belt levels. He also teaches several pivotal undergraduate and graduate courses as part of the U-M Industrial Engineering, Manufacturing, and Interdisciplinary and Professional Engineering programs.

DON LYNCH, Ph.D.
is a Lean Six Sigma Corporate Master Black Belt for SKF, Inc. He holds a Ph.D. in Mechanical Engineering as well as an MBA. He has held positions in engineering, quality, product design and management at Ford Motor Company, Diamond Electric Manufacturing and Visteon Corporation. Dr. Lynch holds six ASQ certifications and is the author of many papers on Lean, Six Sigma and Continuous Improvement.

70–80% OF QUALITY PROBLEMS ORIGINATE IN PRODUCT DEFINITION AND DESIGN

Design for Six Sigma (DFSS) moves from reactive to predictive by designing quality into the product from the start, rather than discovering and attempting to fix product issues during production.
